1 Base URL and X-CM-ID

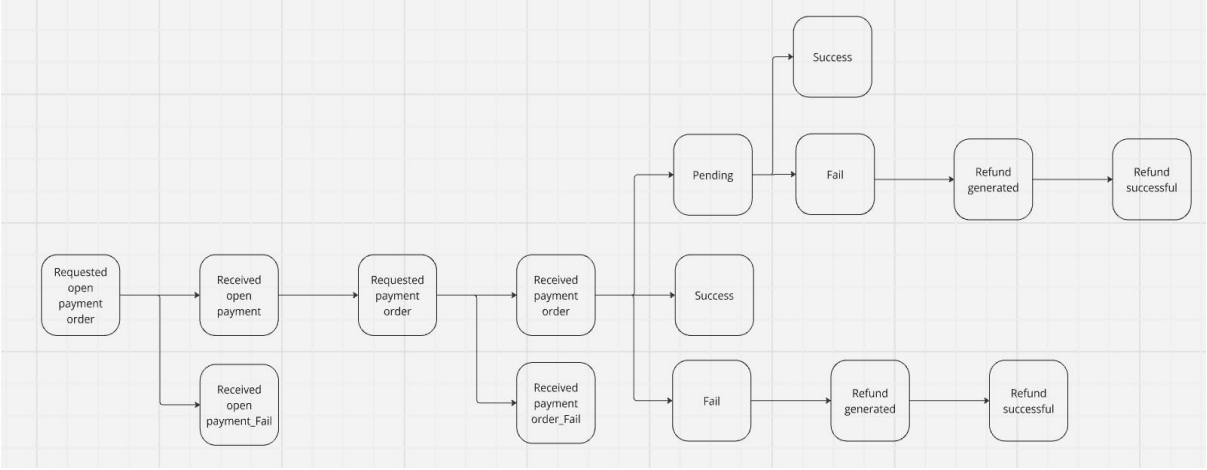
Environment	Base URL	X-CM-ID
Sandbox	https://dev.abdm.gov.in	Sbx
Production	https://apis.abdm.gov.in	Abdm

2 Terminology Definition:

Bridge ID: Is client ID which provided by NHA to HIP (Its alphanumerical eg: SBX_00XXXX)

Service ID: Is Facility ID which is generated from NHPR application (Its alphanumeric eg: IN02100000XX)

3 Workflow of Scan and pay



4 Scan and pay

4.1 Overview

The patient or end-user can log in to the PHR application and use the "Scan and Pay" feature by scanning the facility's QR code. After scanning, the user will receive the outstanding payable amount for the services. The user or patient can then select the services and complete the payment using the HMIS payment gateway.

4.2 List of APIs

4.2.1 SHARE_OPEN_ORDER

This API will be invoked from the integrator application (any PHR application, just like ABHA) to share the user/patient payment details with HMIS/LIMS.
